

Using scheduled notebook updates on Kaggle to maintain a daily updated stock price and news sentiment

Introduction

This notebook is fetching daily stock market data of Reliance from [yfiance](#) api and its daily news articles from [mediastack](#) api and creating a derived dataset which contains **news sentiment**. This notebook will be scheduled to be run daily using scheduled notebook run.

About Dataset

Input - Input data will be the dataset we created from this notebook output by **keeping data in sync with new notebook versions** which can be find in metadata section of a dataset that was created directly from a Kaggle Notebook Output Files.

Output - Notebook will fetch today's stock market data, news articles and its sentiment(positive , negative or neutral) , append all this data with input data and output it to the dataset.

Notebook will generate 3 files -

1. reliance_stock_history.csv
2. reliance_news.json
3. reliance_news_sentiment.csv

reliance_stock_history.csv

1. Date - Trading date
2. Open - Open price of day
3. High - Highest price of day
4. Low - Lowest price of day
5. Close - Closing price of day
6. Volume - Amount of asset/security
7. Dividends - Distribution of stock
8. Stock splits - Shares of stock to its current shareholders

reliance_news.json

1. author - author of news article
2. title - title of news article
3. description - description of news article
4. url - url of news article
5. source - source of news article
6. image - image of news article
7. category - category of news article
8. language - language of news article
9. country - country name
10. published_at - published date

reliance_news_sentiment.csv

1. published_at - published date
2. title - title of news article
3. description - description of news article
4. url - url of news article
5. sentiment - news sentiment
6. sentiment_score - news sentiment score between 0 to 1

How to use this notebook

Follow this steps if you want to create a new dataset for some different company using scheduled notebook updates feature on kaggle-

- Click on the **copy & edit** button
- Create api keys of **mediastack api** and add it to secrets (*Add-ons>Secrets*) with the label **mediastack-token**.
- If you want to create dataset for different company eg. "TESLA" , you can change the variable **company_symbol** to "TESLA" and **search_query** (for news articles) to "tesla" which can be find in **imports** section of the notebook.
- Remove input data
- Go to the *Schedule* a notebook run with frequency **daily** with start date **today** and save .
- Save & run all or do a quick save with the **always save output** selection selected.
- Navigate to the **data/output** section of the notebook viewer and find your output files that you saved,they should be there in the output section and then click on the **new dataset** button that should be right there next to your files and give some name to your dataset and Make sure you click on the **keep data in sync with new notebook versions**
- Add newly created dataset in your notebook input.
- Now change input file path mentioned in **imports** section of the notebook and do save & run all.

After following above steps , your notebook will be **updated daily** and dataset will be updated automatically.

Installations

```
In [1]: # install yfinance
!pip install yfinance

"description": "In the world of activists and pundits, companies making changes involve all reward and no risk, and if companies don't do it they are just greedy. That thinking is why poor people are subsidizing electric cars and solar panels for the rich, which has made reliance on fossil fuels greater in the past decade. In the real world, companies hesitate because there are no answers to the questions that smart people have. When it comes to reusable packaging, there are more science and technology questions than answers, and there are four reasons companies are hesitating.1.The potential to hurt brand...".

  'title': 'UK gears up to produce rare earth magnets, cut reliance on China',
  'description': 'LONDON (AP) Britain could revive domestic production of super strong magnets used in electric vehicles and wind turbines with government support, to cut its reliance on China and achieve vital cuts in carbon emissions, two sources with direct knowledge said. A government-funded feasibility study is due to be published on Friday, laying out the steps [448238]',

 "description": "By Laura Nieve-Cejuela Russell, Nov 7 (EFE). The European Union wants to double its chip production to become less dependent on third parties but not everyone is convinced that embarking on a costly subsidy race to attract factories to the continent is the best path to self-reliance. The global shortage of semiconductor chips due to the ὦThe post Experts cast doubts on EU's bid to boost domestic chip production appeared first on La Prensa Latina Media.",

 'title': 'Amazon Charges Sellers Fees That Are High Enough To Offset Losses From Prime, a New Report Says',
 'description': 'The massive reach of Amazon's e-commerce platform is appealing for any small business that wants to sell its products online. But a new report suggests that the cost of doing business can become a Faustian bargain for a third-party seller, as the fees that Amazon charges them can quickly eat into pr

  'title': '"A parental responsibility": Ireland needs an ombudsman for the future',
  'description': 'Imagine a world where we managed to keep global warming below 1.5 degrees by ending our reliance on fossil fuels completely by the mid-2030s. We invest heavily in renewables and interconnections, and our energy needs including heating and transport are met via carbon-free electricity. High-carbon li
festyles are no longer socially acceptable. We now live in a world of clean but modest energy use. Future generations can cope with the level of climate change brought about by 1.5 degrees of warming. There is societal commitment to keeping fossil fuels in the ground, and adoption of natural climate...',

'title': 'Ireland's reliance on multinationals runs deeper than corporate tax',
'description': 'The arrival of Covid has fallen heavily on lower-paid workers in consumer-facing sectors. That's the same the world over. What's not the same the world over is the hit to public finances. There's been great variation between countries. Ireland will be one of the few to generate more tax this year than in 2019, remarkable given we've had one of the strictest lockdowns in Europe. Most of the consumer-facing economy was heavily curtailed from operating in the first four months of 2021. Yet the latest exchequer returns show the Government's tax take was up by 67.4 billion (13 per cent) in...',

                                "description": "Eleven months have passed since Texas suffered a cold snap that inflicted freezing temperatures and widespread blackouts and caused some Texans to literally freeze to death in their homes. Looking back on that tragedy in a recent article for the Texas Monthly, journalist Russell Gold has a warning: 'It could happen again' - and the next time, the suffering could be even worse. During the Texas Freeze of February 2021, Fox News' Tucker Carlson wrongly blamed green energy for the blackouts - saying, 'It seems pretty clear that a reckless reliance on windmills is the cause of this...',",

  "title": "Gary Trades on Leading and Leaving the Ladder Down With Day Trading",
  "description": "Market volatility, the bane of many investors, lies at the core of most day trading strategies. Proficient day traders often seek out the most volatile stocks, predicting market trends and making the necessary trades to maximize possible profits. At the same time, this reliance on volatility makes day trading an inherently risky endeavor. When trading #88238,The post Gary Trades on Leading and Leaving the Ladder Down With Day Trading appeared first on LA Weekly.",

  'title': 'California Voice: Online gambling measure would hurt Indian tribes',
  'description': 'For the past 28 years, California voters have repeatedly stood with Indian tribes as we've sought to authorize and uphold gaming on tribal lands. Indian gaming has promoted tribal self-reliance - supporting education, infrastructure, health care, housing and other vital resources for our people. In return, Indian tribes have upheld our commitment to California - (#88230)',

Create news sentiment dataset

For sentiment analysis, I am using [huggingface](#) FinBERT model. FinBERT is a pre-trained NLP model to analyze sentiment of financial text. It is built by further training the BERT language model in the finance domain, using a large financial corpus and thereby fine-tuning it for financial sentiment classification.

Refer [this](#) for more info.

```
In [9]: tokenizer = AutoTokenizer.from_pretrained('ProsusAI/finbert')
model = AutoModelForSequenceClassification.from_pretrained('ProsusAI/finbert')
classifier = pipeline('sentiment-analysis', model=model, tokenizer=tokenizer)

657 rows x 6 columns

You will see 3 output files generated **reliance_stock_history.csv**, **reliance_news.json**, **reliance_news_sentiment.csv** after save & run all (manually or scheduled), go to your dataset (reliance stock and news data) is updated with new values appended , you can also go to notebook viewer > Data , and see updated dataset (refresh page if not showing latest data)

click [here](#) to view the dataset generated by this notebook

Final Notes

So we successfully created our own stock market dataset which is scheduled to be updated daily using **scheduled notebook run** feature on Kaggle. We can use this generated dataset and study the stock market behaviour and plan buy or sell strategies accordingly, as it is very difficult for an individual to consider all the current and past information for predicting future trend of a stock.
